

Stuart Wilson

Web Developer

Creative and forward-thinking London based web developer with over 5 years of agency and in-house experience. I'm passionate about building great experiences through collaborative working while promoting code reuse and sustainability.

Experience

Head of Front End Development

Catch (Oct 2015 - Present)

At Catch I've been instrumental in driving the tech credentials of the agency forward through the applied introduction of modern web technologies and standards. After joining as a Front End Developer I was quickly promoted to Head of Front End Development, where I have been responsible for mentoring other developers, driving change and unifying our approach to reduce internal technical hurdles and drive development phases at a quicker pace.

Key Clients: Zoological Society of London / SES / Worldpay / Cancer Research UK / Thomas Cook Airlines

Front End Developer

graze (Aug 2014 - Oct 2015)

Whilst at graze.com I was involved in rewriting and implementing the Pistachio pattern library as part of a team whilst modernising the website's JavaScript using CommonJS modules and Browserify. My day to day duties included developing the website UI to support commercial projects whilst focusing on code modularity, reuse and scalability in an agile team of software developers.

Lead Developer

eight&four (Aug 2012 - Aug 2014)

Joining eight&four as a Junior Developer, I moved quickly within the agency to establish myself as the Lead Developer. Heading up the technical output of the agency, my main responsibilities included developing, testing and deploying primarily WordPress built websites. Other responsibilities as the senior developer on the team involved scoping out new projects with clients, writing technical specifications and bringing technical innovation to the agency.

Key Clients: RSPCA / Solarcentury / Healthcare International / Freesat / Echo Falls / Cosmopolitan
